**CERTIFICATION FORM**

**THIS FORM MUST BE COMPLETED FOR ALL RENOVATION OR DEMOLITION PERMITS NOT EXEMPT FROM THE ASBESTOS INSPECTION PROVISIONS OF THE VUSBC. ORIGINAL SIGNATURES ARE REQUIRED ON ALL ASBESTOS INSPECTION CERTIFICATIONS. THIS CERTIFICATION MUST BE SIGNED BY THE OWNER OF THE PROPERTY OR THE OWNER'S AUTHORIZED AGENT.**

The Code of Virginia and the Virginia Uniform Statewide Building Code (VUSBC) require the submission of an asbestos inspection certification to the local building department prior to the issuance of a building permit allowing a building for which the initial permit was issued prior to January 1, 1985 to be renovated or demolished. The asbestos inspection certification must state that the affected portions of the building have been inspected for the presence of asbestos and the appropriate response actions will be undertaken in accordance with the Code of Virginia Department of Professional and Occupational Regulations. The asbestos inspection requirement does not apply to single family dwellings, or to residential housing with four or fewer units, unless the renovation or demolition of such building is for commercial or public development purposes.

I, \_\_\_\_\_, am the owner or owner's authorized agent of the building listed below and I certify that the building has been inspected for the presence of asbestos in accordance with the asbestos related provisions of the Code of Virginia and the current edition of the VUSBC and that (check one below):

- No asbestos containing materials were found in the affected portions of the building.
- Renovation projects consisting only of repair or replacement of roofing, floorcovering, or siding materials to be repaired or replaced are assumed to contain friable asbestos and that asbestos installation, removal, or encapsulation will be accomplished by a licensed asbestos contractor.
- Asbestos containing materials were found in the affected portions of the building and that appropriate response actions will be undertaken in accordance with all applicable laws and regulations regarding asbestos abatement and further certify that the abatement area will not be re-occupied until the final clearance levels have been found to be within regulated tolerances for re-occupancy.
